BOOMERANG GPS LOCK

PROTECT REMOTE EQUIPMENT

Protects remote or hard to-access infrastructures- such as mobile phone masts, electricity transmission towers and CCTV cameras, as it alerts on any opening of the lock. High quality Mul-T-lock.

LOCK GATES IN REMOTE LOCATION

Periodic reports are sent automatically by the system, thereby eliminating the need for onsite inspection of the padlock. Tracking the exact opening and closing times- for management purposes. Alerts on any opening of the lock.

PROTECT AND TRACK CONTAINERS

Protect goods in transit by tracking a containers location and send an alert if there has been a deviation from a pre-set route or time schedule. Receive an alert if the lock is tampered with in any way.

PROTECT YOUR FREIGHT

Tracks its location and send an alert if there has been a deviation from a pre-set route or time schedule, so is ideal for companies looking to protect their goods in transit or can be used for insurance purposes.
